Augmented Reality/ The Metaverse

Exercise

Harry Potter

## WORK EXPERIENCE

### Frontend Developer - Remote
Micserah Ltd

*12/2021 - Present*                                            *Lagos, Nigeria*
*Nigeria's first indigenous luxury watch brand, with sights set on expanding its reach.*
Achievements/Tasks
- Developed a social media startup now used by over 5,000 users, allowing users to post text, images and other media which other users can comment, like, and interact with, live chat with other platform users, create their own groups and communities to discuss similar ideas.
- Developed an Administrator site, where admins of the platform could keep track of the over 5,000 active users on the platform, ban accounts, verify accounts, moderate the content on the platform and monitor the platform's growth metrics.
- Developed a simple weekly game for users interested in football/soccer allowing them to predict possible outcomes of 10 games being played, share the predictions with friends, and see how well their predictions turn out against other users via the leaderboard.

### Front End Engineer
FireSwitch Technologies

*09/2021 - 12/2021*                                            *Ibadan, Nigeria*
*A startup tech solutions company based in Nigeria focused on fintech and other career growth opportunities.*
Achievements/Tasks
- Redesigned the frontend of the IBErrands webapp and integrated a chat feature into the app.
- Ensured responsive web design on the Reni Store web frontend.
- Mentored 4 web development interns, guiding them in their web development journey.

### Remote Full Stack Developer - Contract
Classy Touch Laundry And Dry Cleaning Services

*11/2019 - Present*                                            *Ibadan, Nigeria*
*A laundry service organisation catering to over 300 Ibadan city residents*
Achievements/Tasks
- Sped up customer onboarding by including a Sign In With Google option that allows new users to create accounts with 1 Tap.
- Revolutionized the customer notification system using the Mailgun and Twilio API's, which an admin accomplishes with 1 click.
- Provided an easy online payment platform for users to pay using the PayStack API, simultaneously providing the CEO with valuable company growth metrics.

### Web Development Intern
FireSwitch Technologies

*06/2019 - 03/2020*                                            *Ibadan, Nigeria*
*A startup tech solutions company based in Nigeria focused on fintech and other career growth opportunities.*
Achievements/Tasks
- Created a simple application for tracking the salaries of employees at the firm.
- Significantly improved quality of work of senior developers by taking over 2 or 3 less heavy duty tasks they were to complete freeing them up to tackle more important tasks.
- Participated in group meetings & team building exercises.

## EDUCATION

### B. Sc in Computer Engineering
University of Lagos

*10/2017 - 09/2021*                                            *Lagos, Nigeria*
