WORK EXPERIENCE

Frontend Developer
Myxellia

01/2024 - Present
Myxellia is an ever-evolving tech of interconnected apps & services, built to make real estate work better for all.
Achievements/Tasks
- Developed in its entirety, the client facing website for a real state development company that has generated over ₦10 billion ($6m) in capital gains.
- Created a fully dynamic property store implementation allowing clients to select a theme for their store website and customize it to their preferred appearance.
- Developed a platform that allows real estate property developers easily handle their properties, track their statistics, and handle their payments.
- Was tasked with handling the company's official site as well as its blog and support centre.

Frontend Developer - Remote
Micserah Ltd

12/2021 - 04/2024   *Lagos, Nigeria*
Nigeria's first indigenous luxury watch brand, with sights set on expanding its reach.
Achievements/Tasks
- Developed a social media platform used by over 10,000 users, where users can post, live chat with other users, and create groups and communities to discuss similar ideas.
- Developed an administrator site, allowing admins keep track of the over 10,000 active users on the platform, moderate the content on the platform, and monitor the platform's metrics.
- Developed a weekly game for users interested in football allowing them to predict possible outcomes of games , share the predictions with friends, and view the leaderboard.

Remote Full Stack Developer - Contract
Classy Touch Laundry And Dry Cleaning Services

11/2019 - 03/2022   *Ibadan, Nigeria*
A laundry service organisation catering to over 300 Ibadan city residents
Achievements/Tasks
- Revolutionized the customer notification system using the Mailgun and Twilio API's, which an admin accomplishes with 1 click.
- Provided an easy online payment platform for users to pay using the PayStack API, simultaneously providing the CEO with valuable company growth metrics.
- Sped up customer registration using Google's One Tap option allowing for quick onboarding.

Front End Engineer
FireSwitch Technologies

09/2021 - 12/2021   *Ibadan, Nigeria*
A startup tech solutions company based in Nigeria focused on fintech and other career growth opportunities.
Achievements/Tasks
- Redesigned the frontend of the IBErrands webapp and integrated a chat feature into the app.
- Ensured responsive web design on the Reni Store web frontend.
- Mentored 4 web development interns, guiding them in their web development journey.

EDUCATION

B. Sc in Computer Engineering
University of Lagos

10/2017 - 09/2021   *Lagos, Nigeria*
